

TRAINING

Courses are periodically run from the centre; these include, basic expedition, pool responder, fire awareness, and first aid. The courses are primarily aimed at group leaders and young volunteers in order for them to gain certified qualifications to enhance their legal responsibility in regard to the safety of young people. If you are interested in any courses or have any suggestions in regard to training, please let us know.

Working Weekends /Volunteer Projects are an integral part of Play Away.

Groups of young people from varying organisations often carry out projects to benefit the centre. Past projects have included land management, painting and decorating, murals and the building of a camp site. We believe that as well as benefiting the centre they also benefit the young people participating. Groups sometimes plan and organise the project themselves with supervision from their leaders and Play Away staff.

If your group would like to involve yourselves in a project at Play Away contact Mark.
